2026 CARBON FOOTPRINT (2025 FIGURES)

Interparfums' total carbon footprint is calculated in accordance with international standards, and namely the Green House Gas Protocol (GHG Protocol) for the conversion of all emission sources into tons of CO₂ equivalent and the Base Carbone®, a public database of emission factors made available by the French Agency for Ecological Transition (ADEME).

- 2025 carbon footprint: **161,861 tons of CO₂ equivalent**
- 2025 carbon intensity: **180 kg of CO₂ per € thousands of sales** (in the low range of our activity sector)

<i>(in tons CO₂ equivalent)</i>	2025	Weight
Scope 1 (energy consumption of gas and fuel)	217	0.13%
Scope 2 (electricity consumption)	60	0.04%
Scope 3 (other indirect emissions)	161,584	99.83%
Total	161,861	100.0%
